NAMAN SAINI

React Native Developer

Sodala, Jaipur, Rajasthan | 9509531768 | namansaini033@gmail.com

PROFESSIONAL SUMMARY

React Native Developer with 2+ years of experience shipping cross-platform iOS/Android apps. Specialized in real-time features — live streaming, video calling, and socket-based chat — using ZegoCloud/Zego Express Engine, with strong fundamentals in Redux Toolkit, REST APIs, Firebase (Auth, Push, Firestore), and Google Sign-In.

TECHNICAL SKILLS

Mobile Development: React Native, React Navigation, Cross-platform iOS/Android
Real-time & Streaming: ZegoCloud / Zego Express Engine (live streaming, video calling), Socket-based real-time communication, SEI data sync
State & Data: Redux, Redux Toolkit, TanStack Query (React Query), Context API
API & Backend Integration: REST APIs, Axios, Fetch API, token refresh flows
Firebase & Auth: Firebase Authentication, Google Sign-In, Push Notifications (FCM), Firestore
Performance: useMemo, useCallback, lazy loading, memoized components, render optimization
UI/UX & Animation: Reanimated, LayoutAnimation, react-native-linear-gradient, custom bottom sheets & modals
Tools: Git, GitHub, Android Studio

EXPERIENCE

React Native Developer — Comfygen Private Limited — Vaishali Nagar, Jaipur **Feb 2024 – Present**

- Built a full live-streaming feature set on ZegoCloud: multi-mode live selection, host-to-audience text bubble overlays synced via ZegoCloud SEI data channel, and an in-stream soundboard (react-native-fs, AsyncStorage, react-native-sound).
- Developed a WhatsApp-style video calling screen using Zego Express Engine, with camera/mic toggle handling, PiP local preview, and socket-based call signaling.
- Built real-time in-app chat/messaging for live streams over sockets, fixing message-ordering, keyboard-avoidance, and reply-layout bugs.
- Fixed ZegoCloud stale-closure bugs across camera, mic, and speaker toggles, and corrected inverted boolean logic in Zego native API calls.
- Integrated Google Sign-In and Firebase Authentication, plus Firebase Push Notifications (FCM) and Firestore for real-time engagement.
- Managed app state with Redux Toolkit and TanStack Query (useInfiniteQuery, useMutation) for paginated feeds and optimistic UI updates.

React Native Intern — Comfygen Private Limited — Vaishali Nagar, Jaipur **Oct 2023 – Jan 2024**

- Developed and integrated UI for multiple screens, ensuring a seamless and responsive user experience across the app.
- Implemented navigation flows using React Navigation and integrated REST APIs with Axios for real-time dynamic content.
- Built reusable components and optimized UI performance by minimizing unnecessary re-renders.

KEY PROJECTS

Live Streaming & Video Calling Platform *(ZegoCloud, Redux Toolkit, Sockets)* — Multi-mode live streaming app with real-time text-bubble overlays (SEI sync), soundboard, in-stream chat, and 1:1 video calling.
UR Physio — Patient-centric Health App *(React Native, Redux Toolkit, Firebase)* — User profile & follow/unfollow system with optimized re-renders and push notifications.
Fitclub & Leytia Coin Wallet *(React Native, Redux, REST APIs)* — Fitness app with UPI payment integration (Google Pay, PhonePe); crypto wallet with secure transaction flows.

EDUCATION

B.Sc. Mathematics — MDSU, Ajmer, Rajasthan (2015 – 2018)
Class XII (PCM) — BPMS, Ajmer, Rajasthan

LANGUAGES

Hindi, English
